

# About Me

*Hi. My Name is Nesh!*

I am currently majoring in Business Finance and am considering the possibility of double-majoring in Information Systems.

The ideal career for me would be to become the CEO of my own company. Although it might not be the most realistic option right after graduation, I want to work in a corporate environment, possibly as a financial advisor.

My technical background is not very strong. I don't really enjoy anything to do with computers and such. I am, however, quite skilled in the design aspect, particularly in creating logos and websites. Some software or websites I use include Wix, which I recently used to develop a website for a family friend's photography business, and Canva for all design-related tasks.

## *Non-Technical Things About Me!*

I love working out; pilates, running, cycling, weightlifting, all of it.

I have been selling online since I was a Sophomore in high school. What started as an effort to get rid of my old clothes and clean out my closet has evolved into my own Etsy store, where I sell custom-made cases.

I heavily value my relationships. Family and friends mean the most to me, and I know without their love and support, I wouldn't be in the place I am in right now.

My favorite artist IN THE WHOLE WORLD is Drake. I've never seen him perform live, and that might be one of my life goals. Along with him, I also love Bryson Tiller, PartyNextDoor, & Destroy Lonely. If it's not Drake, Bryson, PND, or Destroy I'm listening to, then I'm listening to house music.
